

Organization Structure

Organization Structure

Cerebrus, from the inception has incorporated a flat Organisation structure. The Structure is based on the Role of the Individual / Group for the concerned Business activity. Thus the Company is structured on three broad Business Roles

- Application Delivery
- Application Technical Services
- Domain Consulting

Application Delivery Currently all Development effort is centered in Ahmedabad. The basic responsibilities of this Division are:

- Interfacing with the Stock Exchanges & the Regulatory bodies on the Application movements
- Mapping these movements onto the existing products of the Company
- Architecting, building & delivering new applications / products / Services as deemed fit by the Management & the User Segment
- Application Maintenance & Upgradation
- Technology movements of the respective Applications

Application Technical Services Currently the staff of this Division are supporting Customers in four Locations i.e. Mumbai, Ahmedabad, Delhi & Pune. As of date all the Customer Applications being supported are Back Office Applications (for the Stocks & Commodities Segments) The basic responsibilities of this Division are:

- Interfacing with the Customers for Application Functionality enhancement & Maintenance
- Interfacing with the Application Development Team Head for Product enhancement & Maintenance
- Helping Customers move higher on the Technology platforms
- Meeting basic Customer expectations on the existing products
- Deriving new Application / product ideas as deemed fit the User Segment
- Revenue Generation from Application Maintenance & Upgrades

Domain Consulting The strong Domain background of the Management Team staff members led to the initiation of this Business activity around mid 2005. The basic responsibilities of this Division are:

- Interfacing with the User Segment for Application requirements across Functional areas (i.e. irrespective of whether Cerebrus has the required solution as a ready-made product or not)
- Interfacing with other Solution Partners (be it Hardware, System Software Communications, other Application Software etc.) to try to bundle the required solutions for a particular User Profile
- Interfacing with the Stock Exchanges & Regulatory bodies
- Deriving new Application / product ideas as deemed fit by the User Segment
- Building the " Cerebrus " brand over a longer period of time
